

Autumn Popcorn Treats

Turkey Scat

Ingredients:

(For toppings, use what you want, eliminate what you don't want) I do not include exact measurements on toppings because you can use as much or as little as you like.

- * Popcorn (I pop my own and I used 1 cup of organic non-gmo kernels and about two to three tablespoons of olive oil and a pinch of salt.
- * Milk Chocolate morsels
- * White chocolate morsels
- * Butterscotch morsels
- * Dark chocolate morsels
- * Fall themed sprinkles
- * Chocolate sprinkles
- * Orange sugar crystals

- * Nuts (I used sliced almonds, but pecans or peanuts would be great also!)
- * Mini-marshmallows
- * Pretzel sticks
- * Chocolate candy coating(1 package)
- * M&Ms (I used only the brown, orange, red, and yellow ones so that it would look like "Fall")
- * Melted butter
- * Salt
- * Honey

Turkey Scat Instructions:

In advance, get all ingredients out. You can either use a large mixing bowl or you can line two large jelly roll pans or cookie sheets (with sides) with aluminum foil or parchment paper. Spray foil with non-stick spray.

Pop the popcorn and pour into bowl or divide onto the two cookie sheets.

Drizzle melted butter and sprinkle salt to taste over popcorn. Mix with your hands, or a spatula to make sure that all the popcorn gets butter and salt on it. Doing this in a very large bowl works well. (This step is crucial to the taste of the final product)

Next, lightly drizzle honey over all the popcorn, also to taste.

Sprinkle some of each of the dry toppings over the popcorn. (Nuts, morsels, M&Ms, sprinkles, sugar crystals, marshmallows, pretzels, etc.)

Melt candy coating according to package directions and then drizzle over the popcorn. Use two spatulas or two spoons to gently toss the popcorn, to get it evenly coated. It will become a light brown color as the chocolate becomes distributed.

Turkey Scat Instructions (continued):

Now, top with more sprinkles, M&M's and sugar. This will make it festive and pretty! (Remember, we eat with our eyes first)

Now, let it cool, try not to eat it all while it cools (it's harder than it sounds) and then, place it in a container.
